About us

ClimaPod Greenhouses by Vida

We provide high-quality greenhouses for home gardeners of all levels. Our focus is on providing durable structures, fast shipping, and helpful support to ensure you have a rewarding gardening experience.

Delivery

Nationwide Delivery From WA State/USA

ClimaPod ships your greenhouse kit right to your doorstep anywhere in the continental U.S. typically within 5–10 business days with sturdy packaging that's easy for two people to unload and no special equipment needed.

Every order arrives via reliable freight carriers, complete with tracking, packing list, and clear delivery instructions, so you always know what's coming and when.

Warranty

ClimaPod greenhouses come with up to 10 years of warranty coverage, so you can grow with confidence season after season. We stand behind the quality of our kits because your greenhouse should last as long as your passion for growing.

" Very happy with my ClimaPod! It definitely takes some time to put up, but it is definitely worth it! "

ClimaPod Greenhouse Series Features

Spirit

7 feet width + 6mm polycarbonate.
One of the strongest options in the ClimaPod Series! Ideal for small areas.

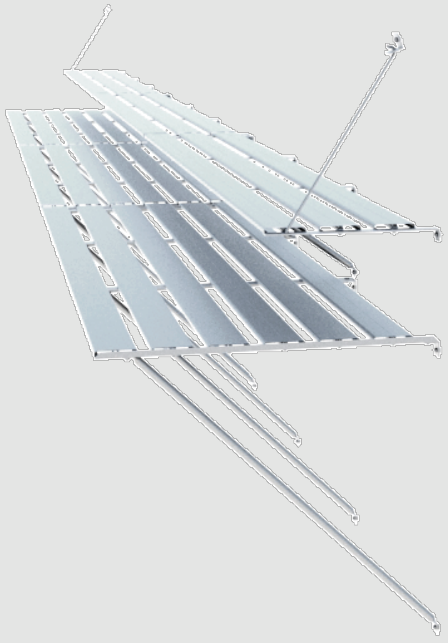
Solar Powered Thermostatic Fans
2-Tier Full Length Aluminum Shelving Set
(top 13" & bottom 25" deep shelves, for one side only)



Spirit

with Sliding or Hinged Door

This durable greenhouse, constructed with 6mm double-wall polycarbonate and an all-aluminum frame, provides superior protection and insulation for your plants. Enjoy an extended growing season of up to two months, plus the ability to easily overwinter your plants with minimal supplemental heat — giving you the ultimate control over your garden's productivity.

Available Sizes

7x7, 7x12, 7x14, 7x21, 7x28, 7x35, 7x42.

Compact Design for Maximum Growth

The Spirit Series features a narrower width than other ClimaPod models, making it ideal for smaller spaces or gardens with limited width. Its compact design allows for easy placement, while you can maximize vertical space with the addition of shelves.

Cozy space for your plants.

The Benefits of Sliding Doors

Imagine effortlessly gliding into your greenhouse, even with a tray of seedlings in hand. Sliding doors make it possible! Their space-saving design maximizes usable space inside and outside your greenhouse. The secure magnetic lock is a breeze to operate with one hand and keeps little ones and furry friends safely out. Plus, enjoy the quiet and smooth operation that only sliding doors can offer.

The Benefits of Hinged Doors

Hinged doors are simple and reliable. A time-tested classic. It is easy to install and use hinged doors in a greenhouse, and a reliable lock with a key will protect the greenhouse from uninvited guests. The spring hook will help keep the doors open so that the wind does not slam them.

Start growing your dream garden today with the ClimaPod Spirit Greenhouse!

- Extremely heavy duty construction: thick aluminum profiles & 6 mm polycarbonate panels.
- Designed for easy assembly. A standard 14' models typically take 2–3 days to build with a team of 2–3 people. With some hands-on experience or extra help, installation can go faster.
- Sliding door with magnetic lock or Hinged door with key lock.
- The durable roof can withstand more than 15 inches of snow load (removing more than 12 inches of snow is recommended).
- Base frame and roof vents included with all models.

Arched

Classic tunnel style with two hinged doors

Perfect for growing organic produce, but can also be used for a wide range of activities, including gardening/flowering, child's playroom, art or music studio, sun room, and as a lounge/exercise room.

Available Sizes

9x14, 9x21, 9x28, 9x35, 9x42.

Maximize Your Harvest

Grow bigger, better, and year-round with the ClimaOrb Arched. This heavy-duty greenhouse boasts 6mm polycarbonate panels and a rust-resistant aluminum frame, built to withstand harsh weather (including over 15" of snow!).

Take your gardening to the next level.

The Benefits of Arched Design

The Arched Greenhouse blends classic design with modern performance, making it an ideal choice for hobbyists and serious gardeners alike. Featuring a graceful tunnel-style arch and constructed with ultra-durable, UV-protected 6mm polycarbonate panels, this greenhouse ensures year-round protection and optimal light diffusion.

The Benefits of Hinged Doors

Hinged doors are simple and reliable. A time-tested classic. It is easy to install and use hinged doors in a greenhouse, and a reliable lock with a key will protect the greenhouse from uninvited guests. The spring hook will help keep the doors open so that the wind does not slam them.

Greenhouse that provide optimal conditions for your garden

- Extremely heavy duty construction: thick aluminum profiles & 6 mm polycarbonate panels.
- Designed for easy assembly. A standard 14′ models typically take 2–3 days to build with a team of 2–3 people. With some hands-on experience or extra help, installation can go faster.
- The durable roof can withstand more than 15 inches of snow load (removing more than 15 inches of snow is recommended).
- Base frame and roof vents included with all models.

Bullet points

Versatile Design

With customizable options and versatile features, our greenhouses can accommodate a wide range of plants and gardening techniques, from seed starting to year-round cultivation.

Bullet points

Climate Control

Enjoy precise control over your growing environment with our greenhouse solutions, equipped with features to regulate temperature, humidity, and ventilation.

“ The quality of this greenhouse is great! Everything fits as it should. ”

Virtue

Arrow-shaped style with two sliding doors

The Virtue's versatile design complements any landscape and offers a safe, controlled environment for a wide range of activities, from seed starting to nurturing your most delicate blooms.

Available Sizes

9x14, 9x21, 9x28, 9x35, 9x42.

Grow Bigger, Easier, Happier

ClimaPod Virtue series offer significantly more usable space than our Spirit series greenhouses, all without sacrificing a comfortable, wide passageway.

Extend your growing season or create a space for hobbies and relaxation.

The Benefits of Arrow Design

The arrow-shaped greenhouse offers superior strength and snow resistance. Its sharp roof angle promotes optimal runoff of rain and snow, reducing the risk of buildup and structural stress. With better vertical space for shelving and plant growth, this design combines modern aesthetics with practical efficiency. Perfect for serious gardeners in all climates.

The Benefits of Sliding Doors

Imagine effortlessly gliding into your greenhouse, even with a tray of seedlings in hand. Sliding doors make it possible! Their space-saving design maximizes usable space inside and outside your greenhouse. The secure magnetic lock is a breeze to operate with one hand and keeps little ones and furry friends safely out. Plus, enjoy the quiet and smooth operation that only sliding doors can offer.

Popular for gardeners who want to extend the growing season for a variety of plants

- Extremely heavy duty construction: thick aluminum profiles & 6 mm polycarbonate panels.
- Sliding doors with magnetic lock.
- Designed for easy assembly. A standard 14’ models typically take 2–3 days to build with a team of 2–3 people. With some hands-on experience or extra help, installation can go faster.
- The durable roof can withstand more than 15 inches of snow load (removing more than 12 inches of snow is recommended).
- Base frame and roof vents included with all models.

Virtue HD

Arrow-shaped style with two hinged doors

The ingenious design solution uses polycarbonate fastening without compromising the tightness of the honeycomb. This combination provides exceptional insulation, wind resistance and long-term structural integrity even in harsh climates. There are many positive examples of withstanding high winds and snow loads.

Available Sizes

9x14, 9x21, 9x28, 9x35, 9x42.

Year-Round Gardening, Simplified

The Virtue's versatile design complements any landscape and offers a safe, controlled environment for a wide range of activities, from seed starting to nurturing your most delicate blooms.

It is a long-term investment in your home, health and quality of life.

ClimaPod Virtue Black is designed to be aesthetically pleasing and durable all in one

- Extremely heavy duty construction: thick aluminum profiles & 6 mm polycarbonate panels.
- Hinged doors with key lock.
- Designed for easy assembly. A standard 14’ models typically take 2–3 days to build with a team of 2–3 people. With some hands-on experience or extra help, installation can go faster.
- The durable roof can withstand more than 15 inches of snow load (removing more than 12 inches of snow is recommended).
- Base frame and roof vents included with all models.

Bullet points

Pre-Drilled Components

All components are pre-drilled for easy assembly, eliminating the need for complicated tools and saving you time during installation.

Bullet points

Durable Construction

Our greenhouses feature heavy-duty aluminum frames and double-wall polycarbonate panels, ensuring long-lasting performance in any weather conditions.

" Once constructed, we are very pleased with the greenhouse. It is solid, looks good and does hold up well in the wind. "

Titan 10

Big reinforced arrow-shaped black or silver color greenhouses

Built with a heavy-duty aluminum frame and incredibly durable 10mm twin-wall polycarbonate, these greenhouses are engineered to withstand the harshest weather conditions. Forget flimsy frames and easily-damaged glazing – the Titan is built to last.

Available Sizes

10x14, 10x21, 10x28.

Unrivaled Strength

The Titan isn't just a greenhouse; it's an investment in your gardening success.

It is a long-term investment in your home, health and quality of life.

Exceptional Weather Tolerance

Engineered to withstand over 20 inches of snow (with recommended snow removal above 18 inches), this greenhouse provides a safe haven for your plants through tough winters. Its thermal efficiency keeps interior temperatures stable, supporting growth even during cold months.

Modern Black Frame

Crafted from high-grade, rust-resistant aluminum and finished in a durable black powder coating, the Titan's frame doesn't just perform — it turns heads. Built to last and engineered for harsh climates, it blends industrial strength with designer appeal.

Grow vegetables and fruits year-round

- Extremely heavy duty construction: thick aluminum profiles & 10 mm polycarbonate panels.
- Hinged doors with key lock.
- Designed for easy assembly. A standard 14' models typically take 2–3 days to build with a team of 2–3 people. With some hands-on experience or extra help, installation can go faster.
- The durable roof can withstand more than 20 inches of snow load (removing more than 18 inches of snow is recommended).
- Base frame and roof vents included with all models.

Titan 12

Large reinforced arrow-shaped black or silver color greenhouses

Discover the power and precision of professional-grade gardening with the Climapod Titan 12 — our most spacious and advanced greenhouse model. Built for ambitious growers, homesteaders, and horticultural enthusiasts, the Titan 12 transforms your outdoor space into a year-round production zone.

Available Sizes

12x14, 12x21, 12x28.

Unmatched Growing Space

You'll benefit from superior light transmission, excellent insulation to protect your plants from extreme temperatures, and the peace of mind that comes with a truly robust greenhouse.

Engineered excellence for demanding growers.

Built for Professionals

Take your cultivation to the next level. Whether you're managing a serious homestead, small farm, or high-yield backyard operation, the Titan 12 Greenhouse delivers unmatched durability, efficiency, and growing control in every season.

Ideal For:

- Year-round gardening in demanding climates;
- Large-scale plant production;
- Professional and semi-professional growers;
- Anyone who refuses to compromise on quality or space.

Grow Bigger, Stronger, Smarter

- Extremely heavy duty construction: thick aluminum profiles & 10 mm polycarbonate panels.
- Hinged doors with key lock.
- Designed for easy assembly. A standard 14' models typically take 2–3 days to build with a team of 2–3 people. With some hands-on experience or extra help, installation can go faster.
- The durable roof can withstand more than 20 inches of snow load (removing more than 18 inches of snow is recommended).
- Base frame and roof vents included with all models.

Solar-Powered Thermostatic Fan

Greenhouse accessories

Our solar-powered thermostatic fan automatically regulates temperature & humidity, protecting your plants from heat stress and disease.
Maintaining the ideal greenhouse environment requires more than just opening doors. The ClimaPod Solar Thermostatic Fan provides the solution: reliable, solar-powered forced-air circulation without the expense of electricity or the hassle of wiring. Its durable aluminum construction ensures long-term performance.

Automatic Window Opener

Greenhouse accessories

To help prevent your greenhouse from overheating, Climapod offers Automatic Window Opener, that will open and close windows according to changing temperature. Make sure your plants are always safe and comfortable even without you being there every time the weather changes.
This energy-independent system opens and closes windows based on temperature changes, ensuring optimal conditions for your plants, even when you're away.

Louver Window

Greenhouse accessories

They are necessary to maintain the microclimate inside your greenhouse. With blinds open cold air enters through the louvers, which are located at the bottom of the greenhouse. And the heated air rises and exits the greenhouse through the windows at the top of the greenhouse. Thus, you regulate not only the temperature, but also the humidity. Louver help you maintain an optimal microclimate for your plants even if you need to keep the greenhouse doors closed.

Two-tier aluminum Shelving

Greenhouse accessories

This durable shelving system is perfect for greenhouses of all sizes. Get organized and maximize your greenhouse space with our ClimaPod Aluminum Greenhouse Shelving! Remember that a greenhouse is a high-humidity environment, so it's important to choose shelves made from rust-resistant materials. Made from durable aluminum, our shelving provides a comfortable and safe environment for growing organic produce. Our shelves were designed to support the weight of dozens of pots of damp soil and plants.

Shade Cloth Black Knitted Net

Garden accessories

The Shade Cloth is useful in the garden (for greenhouses, grapes, flower beds) and for landscaping. Does not emit toxic substances into the atmosphere, completely safe for the environment. The grid is made with a UV stabilizing additive, which means it will not be destroyed by sunlight. Light mesh is easy to transport, carry and install. Does not require special care. Can be applied multiple times.

Hanging Clips Set of Plant Hangers

Greenhouse accessories

Maximize your greenhouse space with our hanging clips — a versatile solution for organizing and supporting your setup.
These durable polypropylene clips slide easily into frame channels and can hold up to 25 lbs each. Use them to hang plants, trellises, shade cloth, tools, or secure tubing for drip irrigation and misting systems. Each set includes 50 reusable clips for flexible, tool-free installation.

Storm Kit

Greenhouse accessories

ClimaPod Storm kit is designed to reinforce and support the overall strength of the greenhouse during severe weather conditions.

It is recommended for ClimaPod customers who tend to get high winds and larger volumes of snow in their area. It's not necessary to use it all the time, but we highly recommend to put it up when bad weather is expected.
